PROFESSIONAL SUMMARY

Backend-focused Software Developer with 3+ years of experience building RESTful APIs, backend services, and enterprise applications using C#, .NET Core, and .NET Framework. Experienced in API integration, database access and query optimization, JWT-based authentication, production troubleshooting, and automated unit testing. Delivered 30+ RESTful APIs and improved response time by approximately 35% through backend optimization and caching. Also develops Laravel/PHP backend systems for ERP and camp-management workflows, bringing experience across multiple backend technology stacks.

TECHNICAL SKILLS

Programming Languages: C#, PHP, TypeScript, JavaScript
.NET Technologies: .NET Core, .NET Framework, ASP.NET MVC
API Development and Integration: RESTful API Design and Development, .NET Core Web API, API Integration, JWT Authentication, Role-Based Authorization
Databases and ORM Technologies: MS SQL Server, MySQL, PostgreSQL, Entity Framework Core, Entity Framework 6, Dapper, ADO.NET
Software Engineering Principles: Object-Oriented Programming (OOP), SOLID Principles, Dependency Injection, Repository Pattern, Unit Testing, Debugging and Troubleshooting, Performance Optimization
Tools and Version Control: Git, GitHub Actions, xUnit, Moq, Fluent Assertions
Other Backend Technologies: Laravel, Azure App Services
AI Tools: Claude, Claude Code, OpenAI Codex, Google Gemini, OpenHands
Frontend Technologies: Angular, HTML, CSS, SCSS, Tailwind CSS

PROFESSIONAL EXPERIENCE

.NET Developer | EQUAL ERP Private Limited | Jan 2024 – Present
UL Cyberpark, Calicut

- Designed and developed 30+ RESTful APIs using .NET Core and .NET Framework to support enterprise workflows across HRMS and property-management applications.
- Refactored database queries and implemented caching to improve backend performance, reducing response time by approximately 35%.
- Implemented JWT authentication and role-based authorization to protect application endpoints.
- Diagnosed and resolved production issues across 10+ modules, helping reduce recurring defect reports and improve reliability for live enterprise clients.
- Developed and maintained Laravel/PHP backend systems for two camp-management platforms, Denholm and Al-Jimi, including APIs for resident tracking, maintenance scheduling, and resource management.

Full Stack Developer | Fantacode Pvt. Ltd. | 2022 – Oct 2023
Cyberpark, Calicut

- Developed and delivered 8+ end-to-end features using .NET Core Web API and Angular, from API design through frontend integration.
- Designed and implemented 15+ API endpoints, collaborating with frontend developers to maintain reliable data flow and resolve integration issues.
- Implemented unit tests using xUnit and Moq, maintaining 75%+ test coverage across critical business logic and reducing regression issues during releases.
- Contributed to Agile delivery in a 4–6 member team, supporting sprint execution and release efficiency.
- Participated in 30+ code reviews and architecture discussions to improve code quality and reduce post-release defects.

SELECTED PROJECTS

Property Management Software | .NET Framework, Entity Framework 6, MySQL

- Developed functionality for tenant tracking, lease management, and maintenance workflows.
- Built REST APIs and optimized database interactions to support efficient data handling.

HR Management Software | .NET Core 8, Entity Framework Core, MySQL

- Developed backend functionality for employee management, HR workflows, and organizational data management.
- Designed and implemented RESTful APIs to support HR operations and seamless integration between application components.
- Optimized database queries and backend logic to improve application performance and maintainability.

Camp Management Systems | Laravel, PHP, MySQL

- Built backend functionality for enterprise camp-management platforms covering accommodation, resource allocation, and resident tracking.
- Developed APIs for maintenance scheduling and reporting dashboards used in day-to-day camp operations.

Feebak | .NET Core, Angular, Dapper, PostgreSQL

- Developed backend APIs and Angular UI components for survey creation, configuration, and publishing workflows in a Genesys Cloud add-on.

Take My Order | .NET Core, Angular, Dapper, PostgreSQL

- Developed backend APIs and Angular UI features for store configuration, product management, and order-processing workflows in an e-commerce platform.

EDUCATION

Bachelor of Science in Computer Science | 2018 – 2021
Don Bosco College, Sultan Bathery

INTERNSHIP

Python & Odoo Development Intern | Technaureus Info Solution | 3 Months

- Gained hands-on experience in Python programming and Odoo ERP module development, contributing to frontend and backend customizations.
