PROFESSIONAL SUMMARY

Backend Software Developer with 3+ years of experience developing and maintaining business web applications and RESTful APIs, including hands-on PHP/Laravel development for enterprise camp, property management, and HRMS systems. Experienced in building backend modules, working with MySQL and relational databases, debugging production issues, optimizing queries, and implementing authentication and authorization. Experienced in frontend integration and currently expanding my skills in React.js to transition toward full-stack development. Additional experience with .NET Core, .NET Framework, Angular, and TypeScript.

TECHNICAL SKILLS

PHP & Laravel: PHP, Laravel, routing, controllers, middleware, request validation, Eloquent ORM, migrations, seeders,

API Development: RESTful APIs, JSON responses, API integration, authentication, authorization, JWT, role-based access control

Databases: MySQL, PostgreSQL, MS SQL Server, relational database design, query optimization, indexing, MongoDb

Backend Practices: SOLID principles, dependency injection, repository pattern, reusable services, error handling, debugging, troubleshooting, caching, code maintenance

Frontend: HTML, CSS, JavaScript, SCSS, Tailwind CSS, Angular, TypeScript, React Js,

Tools & Testing: Git, GitHub Actions, Azure App Services, unit testing, xUnit, Moq, Fluent Assertions

Additional Technologies: .NET Core, .NET Framework, ASP.NET MVC, C#, Node js(molecular js)

AI Tools : Codex, Claude Code, Google Gemini, OpenHands

WORK EXPERIENCE

Software Developer (Laravel) | Equal ERP Private Limited

UL Cyberpark, Calicut | 2024–Present

- Develop and maintain PHP/Laravel backend functionality for enterprise camp management platforms, Denholm and Al-Jimi, supporting resident tracking, maintenance scheduling, resource management, and operational workflows.
- Develop and maintain Laravel-based property management systems, Proptech and Curve, and HRMS system ADMSC, using the same PHP/Laravel stack as the camp management platforms.
- Build backend modules and API functionality supporting business operations and reporting workflows.
- Optimize database queries and implement caching; contributed to an approximately 35% reduction in response time.
- Investigate and resolve production issues across 10+ application modules, implement JWT authentication and role-based authorization, and collaborate with frontend and QA teams.
- Developed and maintained RESTful APIs using ASP.NET Core and .NET Framework for enterprise HRMS and property management systems, supporting business workflows and data integration.
- Optimized database queries and implemented Entity Framework, authentication, and role-based access control (RBAC) to improve application performance, data security, and maintainability.

.NET / Full Stack Developer | Fantacode Pvt. Ltd

Cyberpark, Calicut | 2022–2023

- Developed end-to-end application features using .NET Core Web API and Angular across multiple business modules.
- Designed API endpoints and worked with frontend developers to troubleshoot and resolve integration issues.
- Implemented unit tests using xUnit and Moq, maintaining more than 75% test coverage across critical business logic.
- Contributed to Agile delivery in a 4–6 member team and participated in 30+ code reviews and architecture discussions.

INDEPENDENT PROJECTS

Freelance Full-Stack Developer | Flowflex.AI

- Developed and enhanced frontend features using React.js and backend services using Moleculer.js, integrating with MongoDB for data storage and management.

SELECTED PROJECTS

Camp Management Systems (Denholm & Al-Jimi) | Laravel, PHP, MySQL
- Developed backend functionality for enterprise camp management, including accommodation, resident tracking, resource allocation, maintenance scheduling, and operational workflows.
- Built modules and APIs supporting camp operations and reporting dashboards.

Property Management Systems (Proptech & Curve) | Laravel, PHP, MySQL
- Developed and maintained property management functionality using the same Laravel stack as the camp management systems.
- Supported backend modules and workflows for property management operations.

HRMS System (ADMSC) | Laravel, PHP, MySQL
- Developed and maintained HRMS functionality using Laravel, PHP, and MySQL.
- Supported backend modules and business workflows for human resource management.

HRMS Platforms (Tannery & Alfarah) | .NET Core, EF Core, MySQL
- Built backend functionality for employee records, payroll, attendance, and performance tracking.

Qaryat Property Management Software | .NET Framework, EF6, MySQL
- Developed features for tenant tracking, lease management, maintenance workflows, and REST API data access.

Feebak | .NET Core, Angular, Dapper, PostgreSQL
- Developed backend APIs and Angular UI components for survey creation, configuration, and publishing workflows.

Take My Order | .NET Core, Angular, Dapper, PostgreSQL
- Built features for store configuration, product management, and order-processing workflows.

EDUCATION

Bachelor of Science in Computer Science | Don Bosco College, Sultan Bathery | 2018–2021

INTERNSHIP

Python & Odoo Development Intern | Technaureus Info Solution
3 Months
- Contributed to frontend and backend Odoo customizations and gained hands-on experience with Python and Odoo ERP modules.
